INSTALLATION + FUNCTION

Our awning windows are top-hung and can be adjusted to the desired opening width for maximum safety and security. The outward opening design is perfect for weatherproofing purposes and allow ventilation without impacting internal space.

*Excludes flyscreens and security screens and based on white frames

INSTALLATION + FUNCTION

Our casement windows are side-hung and can be outward or inward opening. They massively outperform standard windows with superior noise reduction and insulation qualities, which only comes with double glazing, due to our superior uPVC Frame, and Argon Filled Insulated Glass Units (IGU's).

*Excludes flyscreens and security screens and based on white frames

INSTALLATION + FUNCTION

The installation and functioning of the double glazed sliding windows helps drastically reduce the build up of dust and grime that accumulates in the joints and tracks of standard aluminium sliding windows, making them almost maintenance free.

*Excludes flyscreens and security screens and based on white frames

INSTALLATION + FUNCTION

Tilt-and-turn double glazed windows are ultra secure, extremely versatile and are very easy to operate. As the name suggests, these windows enable you to open your windows either horizontally, or vertically, to maximise air ventilation and flow. The control of the horizontal or vertical opening is controlled by one easy-to-use handle that has a dual action to open at your desired angle.

*Excludes flyscreens and security screens and based on white frames

**INSTALLATION
+ FUNCTION**

These doors are the perfect way to open up your home in the summer and let an abundance of light in, during winter. With a slim profile that is 100% weatherproof, sealed and ultra secure, they are easy to maintain and a better alternative to bi-fold doors.

*Excludes flyscreens and security screens and based on white frames

INSTALLATION + FUNCTION

Our doubled glazed hinged doors offer a wide range of panel designs, profiles and locking mechanisms. Entrance doors are reinforced with 60mm galvanised steel inserts and feature multi-point locking for added peace of mind. The double glazed hinged doors appear the same as a standard hinged door, but massively outperform standard glass with superior noise reduction and insulation qualities, which only comes with double glazing.

*Excludes flyscreens and security screens and based on white frames

INSTALLATION + FUNCTION

The installation and functioning of the double glazed sliding doors helps drastically reduce the build up of dust and grime that accumulates in the joints and tracks of standard aluminium sliding doors, making them almost maintenance free. The sliding doors can be opened and locked at any opening amount providing peace of mind knowing you are safe and secure.

*Excludes flyscreens and security screens and based on white frames

INSTALLATION + FUNCTION

Our tilt and slide doors combine the elegance and space saving characteristics of sliding doors with the added bonus that comes with double glazing. They offer the standard sliding functionality, in addition to a tilt option, which allows air flow without leaving a door open or compromising safety.

*Excludes flyscreens and security screens and based on white frames
